

Steel Tagging

Customised Tags for your steel that can be used during the Galvanizing process

We are now able to print custom steel tags in-house tailored to your requirements.

- ✓ Unique identification for steel from fabrication through the galvanizing process and onto the final delivery.
- ✓ Customised information. e.g. QR code; lot number, weight, erection number (for site).
- ✓ Tag is still readable after the galvanizing process (including a QR code).

How it works:

1. Request Your Tags

- Provide us with the quantity of tags needed.
- Send us your required information for each tag.

2. We Print & Deliver

- We print the tags according to your specifications.
- Tags are then posted directly to you.

3. You Apply Tags to Steel

- Once your steel is fabricated, simply attach the tags.
- Each piece of steel will have a dedicated tag with custom information.

4. Galvanizing & Delivery

- The tags remain intact and legible throughout the galvanizing process.
- Once galvanized, you can collect or we can deliver / delivery to site available.
